DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a computer system comprising: a storage area to store a data operand and an execution unit, classified in class 711, subclass 214.
 - II. Claims 13-34, drawn to a processor comprising: a decoder configured to decode instructions, classified in class 712, subclasses 32 and 208.
 - III. Claims 35-37, drawn to a computer readable apparatus comprising: a computer readable medium that stores an instruction which is executed by a processor, classified in class 711, subclasses 125 and 147.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in a system which lacked a processor comprising: a decoder configured to decode instructions particulars, or a computer readable apparatus comprising: a computer readable medium that stores an instruction which is executed by a processor, particulars of the other inventions. Similarly, each of the other subcombinations (i.e., each invention II through III) is separately useable. See MPEP § 806.05(d).

Art Unit: 2186

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Edwin Taylor on 11/10/00 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
